

Spot On

This machine-washable laptop case is made from the same neoprene used to make wet suits. Why is that important? Because it will not only do an exceptional job of protecting your computer but also be more than happy to go snorkeling with you. (\$40, *Built*; *builtny.com*)

Seal of Approval

Hard to believe that a device the size of your palm has the power and speed of a professional vacuum sealer. The Frisper Freshkeeper guarantees you a fridge full of food that's really, really...frispy. (\$80, includes five one-quart and five one-gallon bags; *oliso.com*)

Pencil Sharpener

Whether you're writing a shopping list or a long letter to an old friend, you'll have more fun if your pencil is topped with a sparkling Swarovski crystal. (\$7 each, *Piff! Pen*; *redstamp.com*)

Grace Under Pressure

Some like Psi Bands because they use acupressure to help relieve nausea caused by motion sickness, pregnancy, and chemotherapy. But we like 'em because they're cute. (\$15 each, *Psi Bands*; *riteaid.com*)
